2. Number of units non dangerous and dangerous according to ADR regulations

| | IBC 1000 L | Plastic Drums 200 L | Steel Drums | Other Packaging | Remarks |
|--|-----------------|------------------------|-----------------|--------------------|---------|
| | number of items | number of items | number of items | number of items | |
| Empty packaging / Empty container Products not classified | | | | | |
| Empty packaging, with residues of 3, 6.1, 8, 9 Dangerous goods ADR | | | | | |

3. The customer declares that provided classification data is correct and packaging units meet the following requirements:

- Units are empty Packaging is considered empty when this has been carefully emptied in a manner appropriate to the packaging, where the best possible available techniques are used such as pouring, pumping, aspirating, scraping, shaking or a combination of several techniques. Depending on the nature of the residual product that are present, the packaging can be considered to be drip-free, free of trickles or spatula clean.
- Units are free from outside contamination and hermetically closed
- Not damaged and reusable
- Meet ADR provisions if substances are classified (UN approved)
- Filler, filling good and filling good classification clearly indicated, all markings are intact
- No product other than indicated had been filled into the packaging
- MSDS are available and will be submitted on request
- If the packaging contains residual products that can cause problems during cleaning in terms of nuisance caused by odour, reactivity (ADR 5.1 & 5.2), the presence of poison, or if it contains residual products that are generally problematic for the environment, then in consultation with the reconditioner/collector, the packaging can if necessary be delivered pre-cleaned. A sticker stating "pre-cleaned", or a different symbol which shows that pre-cleaning did indeed take place, has to be stuck to this packaging. The delivery note must also state that the packaging has been pre-cleaned.
- Packaging that contained products with GHS-classification H200-H203, H300-301, H310-311, H330-331, H240-241, H340, H350, H360-361, H370, H372 have to be professional disposed at cost of customer

All packaging will be assessed by qualified personnel by entry at Janus Vaten / NCG location. Any preassessment by the driver is tentative and non-binding. If the packaging do not meet the conditions set out above, Janus Vaten / NCG reserves right to:

- Rejecting the pickup
- Charging disposal costs for professional disposal of unusable packaging or residues to the customer.
- Charging incremental freight expenses for pickups where the number of packaging does not match the number in the request

I agree to the terms and conditions set out above
